This presentation contains statements concerning the future performance of the Sartorius Group. These statements are based on assumptions and estimates. Although we are convinced that these forward-looking statements are realistic, we cannot guarantee that they will actually materialize. This is because our assumptions harbor risks and uncertainties that could lead to actual results diverging substantially from the expected ones. It is not planned to update our forward-looking statements. Throughout this presentation, differences may be apparent as a result of rounding during addition.
Agenda

Overview | Strategy

Bioprocess Solutions Division

Lab Products & Services Division

FY 2020 Results | FY 2021 Guidance
Partner of biopharmaceutical research and industry

We empower scientists and engineers to simplify and accelerate progress in life science and bioprocessing, enabling the development of new and better therapies and more affordable medicine.

The United Nations’ sustainability goal ‘Good Health and Well-Being’ is thus an integral part of our core business.
Sartorius at a glance

- ~€2.3bn
  Sales revenue 2020

- ~16.0%
  Sales CAGR\(^1\) 2015-2020

- 29.6%
  EBITDA margin\(^2\) 2020

- 60+
  Locations worldwide, headquartered in Göttingen, Germany

- ~11,000
  Employees

High exposure to attractive biopharma and life science industry

- ~€2.3bn
  Group sales revenue

- €412m

- ~35%
  Sales with life science customers

- ~85%

1 For continued operations, in constant currencies
2 Excluding extraordinary items
Strategic focus of both divisions on the biopharma value chain

Bioprocess Solutions Division

Lab Products & Services Division
Attractive market environment with strong growth opportunities

- **Favorable demographics**
  - 9bn people by 2050; >2bn 60 yrs or older

- **Rise of biosimilars**
  - ~30% CAGR for biosimilar sales 2020–2025

- **Strong R&D pipeline; advances in gene and cell therapy**
  - >40% share of biologics in pharma R&D pipeline

~10% CAGR for biopharma market 2020–2025
Sales revenue has doubled over the last 5 years

Sales CAGR  ~+15%
EBITDA\(^1\) margin  +9.9pp

Sales revenue has doubled over the last 5 years

~€650m

~€1.12bn

~€2.34bn

Sales, growth and CAGR 2011-20 for continued operations, in constant currencies

| ~2% | Capitalized R&D |
| ~3% | Maintenance |

Accelerated and extended global capacity expansion, especially in BPS, due to growth expectations

- Expansion of membrane and filter production capacities
- Expansion of bioreactor production capacities
- Expansion of fluid management and cell culture media production capacities
M&A strategy – adding innovation, enhancing focus

**Acquisition criteria**
- Portfolio: Complementary products or technologies
- Market position: Either among the Top 3 or unique selling point
- Integration: Management capacity; cultural fit
- Price: Fair valuation; reach Sartorius’ profitability level in 2-3 years
Recent acquisitions strengthen portfolio...

**Acquisition of selected life science assets from Danaher**

- **~$825m**
  - Purchase price
- **~$170m**
  - Sales revenue in 2019
- **+ 300**
  - Employees
- **May 2020**
  - Date of consolidation

- Assets include bioanalytical tools for LPS; upstream and downstream technologies for BPS

**Acquisition of BIA Separations**

- **€360mn**
  - Purchase price<sup>1</sup>
- **~€25m**
  - Sales revenue in 2020e
- **+ 120**
  - Employees
- **Nov. 2020**
  - Date of consolidation

- Technology for purification in advanced therapy processes
- Consolidated in BPS division
...especially in downstream

**Acquisition of WaterSep BioSeparations**

- ~$2.5m sales revenue in 2020e
- +15 employees
- Dec. 2020 date of consolidation
- Innovative hollow fiber crossflow filtration units
- Consolidated in BPS division
- Purchase price $27mn plus earn-out

**Agreement to acquire chromatography process equipment division from Novasep**

- ~€37m sales revenue in 2020e
- +100 employees
- H1 2021 closing expected
- Resin-based batch and intensified chromatography systems
- Consolidated in BPS division
- Purchase price not disclosed
Updated 2025 ambition

2025 targets are based on 2020 currency exchange rates; EBITDA excluding extraordinary items
Initial 2025 group sales revenue targets were based on an estimated 2020 group revenue of €2bn, based on the mid-term guidance of 2012.

Expectation was to double the revenue target to €4bn within 5 years.

Actual 2020 Group revenue was approx. €2.3bn; with the overachievement being mainly driven by BPS.

The new mid-term target of €5bn in revenue reflects both the elevated baseline and future growth prospects.

Continued strategy is to achieve the targets primarily through organic growth; acquisition to contribute underproportionally.

The increase in the profitability outlook is due to economies of scale and also reflects the assumption of acquisitions to be initially dilutive.
Our products are widely used in the development and production of biologics against COVID-19

180+ companies developing corona vaccines

The majority work with Sartorius products

Pandemic effects in the divisions in 2020

- BPS with pandemic-related net effect of ~12pp on sales and ~17pp on order intake growth; consisting of investments in vaccine and therapeutic research and manufacturing, also inventory build-up

- LPS with -1pp net effect on sales growth with negative impact from closure of laboratories in China and the U.S. in H1 and positive demand for products involved in testing for coronavirus
Agenda

Overview | Strategy

Bioprocess Solutions Division

Lab Products & Services Division

FY 2020 Results | FY 2021 Guidance
Snapshot of the Bioprocess Solutions Division

Total solution provider for biomanufacturing

Global footprint
Division sales by region
- Americas ~37%
- Asia|Pacific ~24%
- EMEA ~39%

Track record of dynamic growth
Sales revenue, € in millions; EBITDA margin¹ in %
- 2015: €809.2
- 2020: €1,782.6
- CAGR: +17.6%

High share of recurring revenues
Division sales by category
- Equipment ~25%
- Single-use products ~75%

Based on FY 2020 figures; sales CAGR in constant currencies, including non-organic growth.¹ Excluding extraordinary items.
Generating revenue throughout the lifecycle of a biopharma drug

- Wide product range of equipment and consumables for all stages (from pre-commercial to large-scale manufacturing); optimal scalability
- Engineering support with excellent application knowhow and understanding of the entire bio-production process
- Production process of each individual drug is subject to validation by health authorities (e.g. FDA, EMA) and part of the drug approval
Covering most steps of the biopharmaceutical manufacturing process

- Differentiated by the range and completeness of the portfolio
- Excellent positioning in key single-use technologies
- Internationally recognized supplier enabling innovation in bioprocessing through own R&D and partnerships
Integrated services and technologies for all types of biopharmaceuticals

- ~95% of BPS revenue generated with bio/pharma customers
- Antibodies are most relevant; strong position in vaccines as well
- BPS provides solutions for the development and production of all biotechnologically derived drugs and cell derivatives
- These also include new modalities such as cell and gene therapies and viral vectors
## Competitive portfolio across our relevant end-markets

### Filtration
- **Sartorius**
- **Merck | Millipore**
- **Pall**
- **Danaher | Cytiva**
- **Thermo Fisher**
- **Top 3 Players**
  1. Merck | Millipore
  2. Danaher | Pall
  3. Sartorius

### Fluid Management
- **Sartorius**
- **Thermo Fisher**
- **Top 3 Players**
  1. Sartorius
  2. Thermo Fisher
  3. Merck | Millipore

### Fermentation
- **Sartorius**
- **Thermo Fisher**
- **Danaher | Cytiva**
- **Top 3 Players**
  1. Danaher | Cytiva
  2. Merck | Millipore
  3. Sartorius

### Purification
- **Sartorius**
- **Thermo Fisher**
- **Merck | Millipore**
- **Top 3 Players**
  1. Thermo Fisher
  2. Merck | Millipore
  3. Danaher | Cytiva

### Cell Culture Media
- **Sartorius**
- **Thermo Fisher**
- **Top 3 Players**
  1. Thermo Fisher
  2. Merck | Millipore
  3. Danaher | Cytiva

1 Formerly GE Biopharma

---

Pie charts indicate completeness of product offering
Acquisition of selected Danaher life science assets strengthens chromatography portfolio

- Assets include chromatography systems, columns and resins; indispensable for the purification of biologics
- Well-established technologies and innovative solutions in the high-growth areas of single-use and intensified purification
- Complement existing membrane-based solutions enabling Sartorius to support purification strategies at all scales
Recent acquisitions also strengthen offering in other key technologies

- Extensive portfolio of cell culture media with focus on advanced therapies (e.g. cell and gene therapies)
- Gives Sartorius own production and development capabilities
- Access to customers in an increasingly important and fast-growing market

**Tangential flow filtration systems**
- Closing last gaps in TFF portfolio
- Highly competitive product portfolio

**Microcarriers**
- To support growth of adherent cell cultures

**Cell culture media**

---

1 Part of the selected life since assets acquired from Danaher in Q1 2020; 2 Product portfolio of Biological Industries acquired in Q4 2019
BIA Separations - Bioprocessing innovator, addressing bottlenecks in advanced therapies

Ajdovščina, Slovenia
~120 employees
Quadrupling production capacity till end 2021

Portfolio
- Pre-packed monolithic columns optimized for purification in advanced therapy processes (e.g. viruses, plasmids, exosomes)
- Provides significantly higher yield by avoiding shearing effects which occur in traditional purification processes, e.g. in chromatography

Positioning
- Monoliths already used in production of first commercialized advanced therapeutics
- Strong presence in (pre-) clinical projects
WaterSep BioSeparations – Further broadening our filtration portfolio

Marlborough, USA
~15 employees
R&D and production of membranes and cartridges

**Portfolio**
- Hollow-fiber membrane devices and pre-sterilized assemblies for crossflow filtration applications in upstream and downstream
- Addresses customer needs for cost- and time-saving solutions

**Strategic fit**
- Complements offering for cell and gene therapy applications, cell harvesting and various solutions for intensified bioprocessing
U.S. remains most important market; China with highest growth rates

Biologics market growth forecast

- **U.S.**: $119bn (2020) → $167bn (2024), CAGR ~+9%
- **Europe**: $46bn (2020) → $58bn (2024), CAGR ~+6%
- **China**: $38bn (2020) → $365bn (2024), CAGR ~+15%
- **ROW**: $47bn (2020) → $72bn (2024), CAGR ~+7%
Dynamic increase in new biopharma companies in China in the past years

- Huge market potential due to population size and growing average demand
- Biopharma market development priority for China
- Currently a CDMO/biosimilar-driven market; with an increasing number of originators across all biopharma modalities
- Sartorius with long-standing local presence (production in Shanghai and Beijing); further expansion planned
Biosimilars: Strong growth, big opportunities

- Major blockbuster biologics are going off-patent
- Time-to-market is key as only the first providers are most likely profitable
- Several approvals in Asia and Europe; U.S. at the beginning
- For now, relatively small market but with strong growth
- Single-use is the preferred platform for biosimilars

Biosimilars will outperform the biologics market

\[ \text{€ in billions} \]

Pioneer and leader in the growing single-use technology market

**Single-use market penetration expected to increase from ~35% to ~75%**

Single-use products offer advantages over conventional stainless-steel devices

- Capex|Opex reduction over entire lifecycle
- Reduced risk of cross-contamination
- Higher flexibility; advantageous for biosimilars

<table>
<thead>
<tr>

</tbody>
</table>
Single-use allows manufacturers to mitigate investment risks

- Construction of stainless-steel based facilities takes longer and is more complex compared to single-use
- Therefore, investment in stainless-steel facilities has to start in early clinical phase II
- The construction of single-use facilities may start in clinical phase III, reducing investment risks of our clients

<table>

Data based on: Wong et al. (2018): Estimation of clinical trial success rates and related parameters
Analytical technologies to improve process economics and safety

- Bioprocess sensors, analyzers and software
- Collect, monitor and control quality-critical parameters
- Analyze data to obtain a better process understanding
- Use knowledge for process development, optimization and automation
- Allows customers to increase time-to-market, to reduce COGS, to improve process robustness and product quality
- Intention to upgrade Umetrics software suite with advanced analytics technologies such as AI and machine learning
- Data analytics just at the beginning in biomanufacturing with high potential
High innovation dynamics in Biopharma

- Development of new drugs and vaccines must be accelerated, e.g. through more automation.
- Increased efficiency possible in the production of 'classic' biopharmaceuticals and biosimilars.
- New tools and methods required e.g. for novel cell and gene therapies.
- Future drug manufacturing is more automated, intensified and scalable.
Limited dependence on individual accounts

- More than half of 2020 BPS sales were generated with the Top 50 customers
- No individual customer accounts for more than 5% of BPS sales revenue

Long-term business relationships with leading global (bio-) pharma companies

[Logos of GlaxoSmithKline, Novartis, Boehringer Ingelheim, Lonza, Sanofi, Roche, Pfizer, Amgen, Bayer Healthcare, MSD]

Limited dependence on individual accounts

Sales to Top 50 customers in 2020, € in millions

- Top 10: ~28%
- 11 to 20: ~40%
- 21 to 30: ~48%
- 31 to 40: ~53%
- 41 to 50: ~57%

Cumulative share
Four strong pillars drive above-average growth

- **Pharma market** → CAGR 3-6%
- **Biopharma market** → CAGR ~10%
- **Single-use penetration** → Double-digit growth
- **Market share gains** → Esp. in North America

~+18% Organic CAGR\(^1\)

\(^1\) CAGR 2014 to 2020, excluding FX effects and acquisitions

Lab Products & Services Division

FY 2020 Results | FY 2021 Guidance
Snapshot of the Lab Products & Services Division

Premium vendor for laboratories

Global footprint
Division sales by region

Americas ~29%
Asia|Pacific ~28%
EMEA ~43%

Division in transition to a new growth and profitability profile
Sales revenue, € in millions; EBITDA margin\(^1\) in %

Build-up of bioanalytics portfolio since 2016
CAGR +14.9%
CAGR +7.0%

Based on FY 2019 figures; sales growth and CAGR in constant currencies, including acquisitions \(^1\) Excluding extraordinary items
Portfolio includes lab essentials and bioanalytical instruments; increased focus on life science end-market

Life Science Research sales
~50%
- Lab balances, pipettes, lab water systems and filtration for bio/pharma QC/QA
- ~30% share of bioanalytics; used for analysis of cells or biomolecular interactions in drug and cell line development

Applied Research sales
~50%
- Lab balances, pipettes, lab water systems and filtration
- Addresses QC/QA laboratories in food & beverage and chemical industry among others
Strong market position in essential laboratory product categories

- Average global market share of >10%
- High gross margins offer potential for economies of scale
- Growth potential especially in the U.S. and Asia
- Market growth related to R&D spending in the individual end markets

Lab balances

#4
Bioanalytical tools to address pain points of our customers

- **Drug discovery**: 4-5 years
- **Preclinical testing**: 1 year
- **Clinical trials**: 4-7 years
- **Drug approval**: 1-2 years

**Our approach**
- Facilitate digitalization and automatization
- Decrease likelihood of failure
- Reduce time and costs in molecule development; increase speed-to-market

**Average costs of developing a successful drug**: €2bn

**Probability of clinical success (Phase I to approval)**: ~10%

**From drug discovery to approval**: >10 years

Based on data from the Tufts Center for the Study of Drug Development and the Association of the British Pharmaceutical Industry
Overview of bioanalytical portfolio

Solutions for cell analysis
- IncuCyte: Real-time imaging and analysis of living cells
- iQue Screener: Rapid, high content analysis of cells, beads and secreted proteins

Solutions for protein analysis
- Octet: Real-time, label-free measurement of biomolecular interactions

Competitive environment
- Beckman Coulter
- Becton Dickinson
- Bio-Rad
- Cytiva
- Merck
- PerkinElmer
- Thermo Fisher
- ...
Solutions complement each other, optimize successive workflows and have synergies with BPS products

**Application example: Molecule development**

- **iQueScreener**
  Screening of antibody libraries for target-reactive candidates

- **Octet**
  Measure how strong the identified antibodies bind to their target and rank

- **IncuCyte | iQueScreener**
  Selection of lead candidates and functional characterization

**Application example: Cell line development**

- **Octet**
  Identify high-producing clones in expression library

- **ambr15 (BPS division)**
  Culture identified clones on small-scale

- **Octet | iQueScreener**
  Analysis and characterization of cell line and antibodies
Bioanalytics increases addressable market and changes growth profile

Addressable market of LPS
€ in billions

- Different growth rate of bioanalytics due to high exposure to biopharmaceutical R&D
- By 2025, two-thirds of the addressable market growth will come from bioanalytics
- Thus, growth and profitability profile of LPS is changing over time
Agenda

- Acquisitions contribute a good 7pp to sales growth; net effect from pandemic a good 8pp / close to 14pp for order intake
- Underlying EBITDA margin driven by economies of scale and underproportionate development of costs in some areas due to pandemic; acquisitions with slightly positive effect; slightly dilutive effect from currencies

---

<sup>1</sup> Constant currencies  
<sup>2</sup> Underlying = excluding extraordinary items  
<sup>3</sup> Underlying EPS = based on net profit after non-controlling interest; adjusted for extraordinary items as well as amortization and based on a normalized financial result and normalized tax rate
Double-digit sales growth in all geographies

- **Americas**: BPS benefits from demand in connection with the development of corona vaccines; LPS with larger acquisition impact
- **EMEA**: BPS with tailwinds from vaccine developers; solid performance of LPS considering economic challenges
- **Asia|Pacific**: BPS with the highest order momentum; LPS demand improved after lockdown lifted in China with catch-up effects

Acc. to customers’ location; growth in constant currencies
BPS: Dynamic growth across all product categories and regions

- Strong organic growth; pandemic-driven effects presumably around 12pp (majority of that from demand related to coronavirus vaccines and therapeutics but also related to inventory build-up), acquisitions accounted for close to 5pp of growth
- Pandemic-related effects estimated at around 17pp of order intake growth
- Underlying EBITDA margin rose due to economies of scale and reduced costs in some areas due to pandemic; slight FX dilution

1 2019 figures reported: Order intake €1,479.3m, sales €1,372.1m, underlying EBITDA €406.8m
LPS: Rebound and catch-up effects after challenging first half

- In particular, high demand for products used in the context of coronavirus testing
- Acquisitions contribute around 15pp to sales growth; net effect from pandemic approx. -1pp
- Underlying EBITDA margin influenced by lower capacity utilization due to pandemic; acquisitions accretive by a good 2pp

2019 figures reported: Order intake €460.3m, sales €454.9m, underlying EBITDA €89.0m
Operating cash flow increases significantly
