Entris® II
Laboratory Balances
Enbris® II – Best Value in its Class for Basic Weighing Tasks

Every Sartorius balance offers quality, value, and consistency.

No matter what you’re weighing, the new Enbris® II balance is always the right choice. Offering unrivalled value and backed by almost 150 years of German engineering expertise, the Enbris® II comes in two product lines, so you can find the balance that meets your specific weighing needs.

Our Enbris® II Essential line is the only balance in its class offering isoCAL, LED touch technology, and 12 built-in applications at a budget price. With over 40 models from which to choose, you will surely find a model to meet your basic weighing needs.

Our Enbris® II Advanced line gives you additional value to the Enbris® II portfolio, with over 38 models offering benefits such as real-time level support, integrated protection systems, CalAuditTrail, a graphic touch display and 13 built-in application programs.

Read on to learn why the Enbris® II has the best value in its class for basic weighing tasks.
Quality, Value and Consistency

For accurate weighing results you can trust time after time

Highest quality standards, engineered in Germany
- Highly accurate results year in and year out
- Guaranteed via monolithic weigh cell technology, invented by Sartorius*
- Fastest stabilization time in its class
- Using state-of-the-art weighing sensors
- Best repeatability
- With rectangular weighing pan
- Overload protection
- Rugged design weighs up to a pre-set amount
- Guaranteed reliability
- With the self-test “@start”
- Made in Germany

Easy clean for operational efficiency and durability
- High chemical resistance
- Ensured using parts made from hard-wearing polybutylene terephthalate (PBT), stainless steel and glass
- Prevents cross contamination
- With wipe clean design and easy-to-remove parts

Effective draft shield
- Minimizes weighing errors caused by electrostatically charged samples
- Using specially coated glass parts

Added value for the Entris® II Advanced line:
- Built-in real-time level support
  - Simplifies balance leveling
  - With an internal electronic level sensor that continuously monitors for proper leveling, alarm messaging when it isn’t leveled, and interactive user guidance
- Integrated protection systems
  - Increases reliability of weighing results
  - With 3 configurable levels to determine valid weighing data and ensure only valid data is transferred to external devices

* may differ for a few models
Innovations in this Weighing Class

For efficient, user-friendly operation

isoCAL (internal calibration and adjustment) for total assurance of accurate weighing results
- Optimal accuracy and operating convenience
- Using fully automated internal temperature and time-controlled calibration and adjustment feature, unique in this weighing class
- Assures (SOP) compliant operation
- With self-notification if calibration is outside the normal range

Hybrid screen for excellent readability and use
- Combines intuitive, wear resistant LED and touch technology
- Provides an easy and clear structured user interface

Data output for dynamic weighing applications
- Configurable time interval for data output

Added value for the Entris® II Advanced line:
- Even easier usability with graphic touch display

Plug-and-play convenience
- Automatically detects Sartorius accessories (e.g. printer, second display)
- Real “PC-direct feature” for easy connection to a PC to transfer weighing data directly into spreadsheets or documents such as Microsoft® Excel or Word

Easily adapts to your ambient conditions
- With just one click on the home screen

Added value for the Entris® II Advanced line: CalAuditTrail
- Provides gapless documentation
- With automatic documentation of calibration and levelling processes, and date and time stamp

6
Universal Application

For future-proof assurance

The right model for each and every task
Finding the right model to suit any weighing application is simple. Our Entris® II Essential line offers a range of 40 models (the largest portfolio in its class), while our Entris® II Advanced line offers an additional 38 models. Depending on the model you choose, your weighing range can start as low as 60 g and go up to 12,200 g, with a readability from 0.1 mg to 1 g.

Built-in applications with GLP | GMP compliant printout | data output
- Weighing | Dosing
- Counting
- Percentage weighing
- Mixing | Net Total
- Components | Totalizing
- Animal weighing
- Calculation | Free Factor
- Density determination
- Statistics
- Peak hold
- Check weighing
- Mass unit conversion
- Underfloor weighing feature for bigger samples

Weighing chamber (where applicable)
- Highest usable weighing chamber height for easy handling of even large containers
- Convenient access to weighing pan
- Easy-to-(re)move top and side sliding doors
- Draft shield can be removed completely

Modern, up-to-date connectivity methods
- Future-proof USB Type C interface
- Industry-proof RS232 9-pin interface
- Backwards compatibility (by using RS232 port)

Added value for the Entris® II Advanced line:
- Enables multiple connection to external devices via a second USB Type C interface
- Enables transfer of data (such as weights, calibration reports) to USB Stick
- Allows customized printouts with up to 6 individual identifiers

8 built-in languages for international operation
- English, German, French, Italian, Spanish, Portuguese, Russian, Polish

Added value for the Entris® II Advanced line: Chinese, Japanese, Korean, Turkish, Hungarian

Password protection for secure operation
- Protects the balance against unintentional changes

Added value for the Entris® II Advanced line:
- Controlled access to balance settings with User Management
