Tacta Mechanical Pipettes
Perfectly Balanced
Tacta Mechanical Pipettes

Have you ever considered the overall user experience in pipetting? We have.

Sartorius proudly presents Tacta, the new premium mechanical pipette with superb comfort and reliability. Tacta makes pipetting effortless and safe, while producing accurate and reliable results time after time.

At Sartorius, we listened to our customers and combined their views with our extensive experience, and state-of-the-art R&D, to create the exceptionally balanced design of Tacta. Tacta is designed to feel great in your hand, and it is easy and comfortable to use. All materials used for Tacta have been carefully selected, and each component is designed to meet the highest standards.
The Tacta Experience - Perfectly Balanced

- Comfortable to hold due to the ergonomically designed handle
- Low pipetting and tip ejection forces that reduce the risk of Work Related Upper Limb Disorder (WRULD)
- The unique Sartorius Optilock system provides flexibility for volume adjustment and locking
- Controlled and smooth tip ejection with the new Sartorius Optject technology
- Calibration adjustment to provide accurate results for various liquid types
- Easy to clean, with only three parts to disassemble
- Reliable results, even over lengthy pipetting periods
Feel the Comfort

Superior Ergonomics

Tacta rests lightly in your hand thanks to its ergonomically designed handle and finger hook.

Tacta is effortless to use and exceptionally comfortable to hold. Tacta eases your workload and protects you from strain, even when you pipette for extended periods of your working day. The unique handle and finger hook design lets the pipette rest lightly in your hand, with no need to grip the handle tightly.

Low Pipetting, Tip Loading and Ejection Forces

The forces needed for a pipetting cycle, from tip attachment to pipetting and finally tip ejection, are exceptionally low with Tacta, protecting you from WRULD.

The Optiload feature, with spring-loaded tip cones in both the single and multichannel models, secures tip loading with perfect sealing and minimal force. Consequently, Optiload also ensures light tip ejection to protect your hand.

The light tip ejection is further enhanced by Sartorius Optiject, the soft, levered tip ejection feature that lets the tip detach in a smooth, controlled way with little force.

Large, Clear Display

The large, easy-to-read display helps you to see all four digits of the set volume from a distance without straining your eyes. The volume is easy to read even when the pipette is angled – eliminating the need to turn your head into an uncomfortable position.
Calibration Adjustment

Tacta is very easy to adjust, for various types of liquids, using a simple adjustment key. The adjustment scale shows the degree of adjustment. By noting this value for a specific liquid, you can return to that setting any time. Easy calibration adjustment ensures accurate results with a variety of liquids.

Volume Adjustment

Use the Sartorius Optilock feature to prevent accidental volume changes during pipetting. Either hold down the volume lock button with one hand and adjust the volume with the other, then release to lock, or with just one hand, slide the volume lock up, adjust the volume and slide down to lock again. The choice is in your hands.
Safe from Contamination

Safe-Cone Filters

The exchangeable Safe-Cone Filters, used in pipette tip cones, act as barriers to prevent sample aerosols and fluids from contaminating the internal components of the pipette.

The unique Safe-Cone Filter ejector enables the removal of used filters without human contact with contaminated filters.

Safe-Cone Filters are available for all Tacta models greater than 10 μl and offer a cost-effective method to reduce contamination. Filters should be changed regularly, and always after over-aspiration.

Safe-Cone Filters protect the pipette from contamination.

Easy Cleaning

Tacta is the quickest and easiest pipette, on the market, to clean, with only three parts to be disassembled for cleaning and no tools are needed for disassembly. Tacta can also be steam-sterilized or autoclaved as-is, without disassembly. It has also high UV and chemical resistance.

The test was carried out using 1000 μl pipettes.
Achieve Reliable Results

Proven Precision
The following graph illustrates how the precision of pipetting results is impacted over time when using various pipettes. Tacta, which is designed down to the last detail to create a comfortable pipetting experience, produced consistently precise results during a three-hour test period.

Precision of results tested over a three-hour period using four pipettes from various manufacturers. The test was performed by an independent laboratory in accordance with the ISO 8655 standard using 1000 μl pipettes with 1000 μl tips from the corresponding manufacturers.

Sartorius Pipette Tips and Services
Complete your Tacta experience with original Sartorius pipette tips. Our Optifit Tips and SafetySpace Filter Tips are designed to fit your Tacta pipette perfectly, enabling maximum accuracy and precision.
Sartorius also provides pipette maintenance, repair and calibration services globally. Contact your nearest Sartorius service centre or office for services.

* Low Retention Tips are available in volumes up to 1200 µl.

Storing the Pipettes

When Tacta is not in use, it should be stored in an upright position in order to avoid contamination from work surfaces. The compact Carousel Stand, designed for six pipettes, is ideal for saving bench space. The Linear Stand is designed for all Sartorius mechanical and electronic pipettes. The simplest solution of all is to attach pipette holders to the front edge of a shelf. All Tactas are supplied with a pipette holder.
