Equipment Qualification (IQ | OQ)  
Arium® Water Purification Systems

Benefits
- Compliance with regulatory requirements (GLP | GMP)
- Risk-based verification of device performance
- Proof of suitability for your devices
- Extensive documentation and certificates
- Audit security

Product Information
You must demonstrate proof of suitability for the equipment in your GLP | GMP regulated laboratory. The Sartorius equipment qualification is documented proof that your water purification system has been installed correctly, works reliably and is suitable for use. Our IQ | OQ qualification follows the “risk-based approach”, as recommended for equipment inspections in regulated industries. Specially trained Sartorius service engineers perform all the necessary tests directly on-site at your premises. The comprehensive and customer-specific documentation can easily be integrated into existing quality management systems.
Specifications

- On-site qualification (IQ | OQ) by a specially trained service technician
- Performance of device-specific tests for the Installation Qualification (IQ). This includes, among others:
  - Checking the equipment delivery for completeness and any transport damage
  - Documentation of installation conditions
  - Verification of correct installation of equipment components
- Performance of device-specific tests for the Operational Qualification (OQ). This includes, among others:
  - Function tests
  - Initial metrological equipment check
  - Training of the operating personnel
  - Complete documentation in special IQ | OQ templates
  - Consultation on device maintenance and maintenance cycles

Customer Prerequisites

- Device is at the installation site and has been sufficiently acclimatized
- The device is freely accessible
- To wall-mount the device, the included wall bracket must be pre-installed by the customer
- Supply lines available at the installation site, max. 1 m away from the location of the system
- Feed water pressure according to device specifications
- Atmospherically vented drain with odor trap (max. 1 m away from the location of the system)
- Splash-proof wall outlet (240 V, 50 Hz), protected with 16 A fuse, max. 1 m away from the location of the system
